

Trần Minh Nghĩa

BIM PLUMBING MODELER

036 809 7071 manghi.work@gmail.com Website HCMC, Vietnam

CAREER OBJECTIVE

Environmental Engineering graduate specializing in Water Supply & Drainage, with a rich background in 3D digital modeling and complex system architecture. Seeking a BIM Modeler (Plumbing/MEP) position to leverage my technical knowledge of water/wastewater systems alongside spatial coordination skills to deliver accurate, clash-free BIM models and advance toward a BIM Manager role.

EDUCATION

Bachelor of Environmental Engineering Technology - Ton Duc Thang University
2014 - 2019

Advanced Diploma of Multimedia Specialist Program - Arena Multimedia
2019 - 2022

CERTIFICATIONS

BIM Revit MEPF - RevitTech
2026

Google UX Design Professional - Coursera
2023

Microsoft Office Specialist (MOS) - IIG Vietnam
2015

EXPERIENCE

- **Product Designer — Hippo Technology**

2024 – 2026

 - **System Architecture & Standardization:** Built and maintained comprehensive, scalable component systems and visual documentation, ensuring high precision, consistency, and reusability across complex digital ecosystems.
 - **Cross-functional & Technical Coordination:** Collaborated directly with product owners, stakeholders, and engineering teams in an Agile environment to translate complex business logic into structured technical solutions.
 - **Complex Workflow Mapping:** Designed end-to-end structural workflows, spatial layouts, and interactive prototypes, optimizing complex multi-layered system processes for maximum clarity.
 - **AI-Powered Process Acceleration:** Applied modern AI tools to accelerate technical research, document analysis, and workflow optimization, significantly streamlining early-stage discovery phases.

Transferable Skills:

Standardized Component Systems

Cross-functional Coordination

Technical System Workflows

AI Workflow Acceleration
- **UI/UX Designer — ITC Group**

2022

 - **Complex System Workflow Design:** Designed intuitive user interfaces and structured workflows for enterprise management systems, simplifying complex operational data for technical and non-technical users.
 - **Technical Documentation & Alignment:** Partnered closely with Business Analysts (BAs) and Quality Assurance (QA) teams to review, align, and refine technical requirement documents (BRDs) and test scenarios, ensuring strict design-to-implementation accuracy.
 - **System Consistency & Visual Standards:** Developed cohesive visual layouts and structured brand components for internal enterprise product lines, maintaining high visual alignment across all platforms.

Transferable Skills:

Complex Workflow Optimization

Technical Documentation & QA Precision
- **UI Designer — TTM68 Network**

2022

 - **Spatial Layout & Wireframing:** Designed structured spatial layouts and detailed wireframes for complex digital platforms, ensuring clear spatial hierarchy and organized component distribution.
 - **Complex System Visualization:** Translated multi-layered system structures and technical requirements into clear, intuitive 2D/3D visual interfaces to optimize navigation and clarity.

Transferable Skills:

Structural Layout & Wireframing

System Architecture Mapping

EXPERIENCE

- Web Designer — WOWCNS Vietnam

2021

- **Technical Layout & Dimensional Precision:** Created responsive layout frameworks with a focus on structural accuracy, grid alignment, and clean visual organization.
 - **Implementation & Quality Inspection:** Worked directly with engineering teams to inspect, fine-tune, and verify design outputs against technical specifications, ensuring exact pixel-perfect fidelity.

Transferable Skills:

Technical Layout

Implementation & Quality Inspection
- Graphic Designer — 4Bros Media

2021

- **Production Specifications:** Prepared production-ready technical assets, managing layout scale, output specifications, and precision tolerances.
 - **Asset Standardization:** Developed scalable visual assets and digital mockups following strict technical requirements for manufacturing and output.

Transferable Skills:

Dimensional Precision & Layout Scale

Pre-Production & File Specifications
- Staff — Canadisign Home Solutions

2020

- AutoCAD drawing.
 - Statistical report.

Transferable Skills:

Technical Support

Quantity Survey & Reporting
- Staff — Good Land Informatics

2020

- Data processing.
 - Paperwork.
 - Statistical report.

Transferable Skills:

Data Analysis

Documentation
- Technical Staff — Gia Bao Trading Service Techniques

2018

- **On-Site MEP Installation:** Supported hands-on construction, piping layout, and installation of water supply, drainage, and electrical systems for the Vietnam-Canada (Montessori) Preschool project.
 - **Technical Site Coordination:** Assisted in reviewing site conditions against engineering drawings to support smooth installation on site.

Transferable Skills:

Construction

Installation

SOFTWARE SKILLS

Main

Revit MEPF

AutoCAD

Navisworks Manage

Microsoft Office

Other

AutoDesk Maya, Blender, Spline, ZBrush, Adobe Creative Cloud, Figma.
